(GOD) and I claim:

- 1. A perpetual energy complex of GOD comprising: charging means defining two batteries in a system;
- a first battery to fit a first charger, whereby, a second battery is sized to fit a second charger;
- a first DC to AC converter means, and a first plug to fit a first receptacle on said first charger;
- a second DC to AC converter means on a second plug in a second receptacle upon said second charger, and means for said batteries to load each other;
- a first AC adaptor and a third plug to fit a first jack upon said first charger, as said adaptor is to fit a socket via said second converter means, said second charger defines means for outputting AC current for charging said first battery;
- a second AC adaptor and a fourth plug so as to fit a second jack about said second charger, as said adaptor is to fit a socket concerning said first converter means, said first charger having means to output current to charge said second battery; circuit breaker means for excluding said batteries from power by means of obstructing two circuits.
- 2. A perpetual energy system as defined in claim 1, wherein said charging means has two pairs of LEDs to show low charge, said breaker means is for closing said circuits.
- 3. A perpetual energy system as defined in claim 1, wherein said batteries having a fifth to sixth LED to say full, said circuits include means for being opened.
- 4. A perpetual energy system as defined in claim 1, wherein said batteries connected via series, and means to operate, a seventh, and eighth LED have means to emit light.
- 5. A perpetual energy system as defined in claim 1, wherein said charging means is to connect to a generator, said batteries have means to work, as said generator is off.

- 6. A perpetual energy system as defined in claim 1, wherein said batteries thereby, have nonmetallic electric conductors, a solvent to dissolve, and a ninth LED on power.
- 7. A perpetual energy system as defined in claim 6, wherein said batteries have a transmitter and means to be refilled, as said ninth LED is to glow at one hundred years.
 - 8. A perpetual energy complex of GOD comprising: charging means having two batteries such that said batteries are to fit in conventional chargers;
 - DC to AC converter means for converting DC current to alternating current regarding two converters;
 - a first, and second AC adaptor including means for charging said batteries by said converter means; generating stations means for generating perpetual energy;
 - illumination means for illuminating said batteries having spiraled light fixtures, so as to enclose lamps, an authorized person comprises a scooter, and means for replacing said lamps;
 - elevator means for inspection via receptacles, and plugs, and means to plug in said converters;
- 9. A perpetual energy system as defined in claim 8, wherein said batteries include means to load one another, an adjacent bridge includes self chargeable batteries, also.
- 10. A perpetual energy system as defined in claim 9, wherein said bridge having bases on each side of a river, said bases comprise said self chargeable batteries, therein.
- 11. A perpetual energy system as defined in claim 9, wherein said bridge having lamps and means to illuminate, said batteries include means to illuminate said bridge.
- 12. A perpetual energy system as defined in claim 8. wherein said batteries include structures, a main control center defines feeders, branch circuits and a system ground.

- 13. A perpetual energy system as defined in claim 11, wherein said lamps via said bridge comprises means to be turned on by means of a timer, conventionally.
- 14. A perpetual energy system as defined in claim 12, wherein said main center has branch control centers, and means to send perpetual energy to various parts of a city.
